PROFESSIONAL SUMMARY

Aspiring Full-Stack Developer with a strong foundation in JavaScript, React.js, Node.js, Express.js, MongoDB, and Next.js. Built multiple full-stack projects, including an AI-powered review management platform, a farm ERP system, and a jewellery CMS, demonstrating practical knowledge of REST APIs, authentication, and production-ready web application development. Passionate about learning modern technologies and building reliable software that solves real-world problems.

CORE SKILLS

Technical

- **Languages:** JavaScript, Python, TypeScript, Java (Basic)
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs,
- **Database:** MongoDB, SQL
- **Libraries & Tools:** Pandas, NumPy, Git, GitHub, Postman, Docker
- **Authentication & Validation:** JWT, Bcrypt, Zod, Yup, NextAuth.js
- **Other:** React Query (TanStack Query), React Hook Form, Mongoose (ODM), Supabase

Soft

- Communication
- Adaptability
- Problem Solving

EDUCATION

K. S. School of Business Management, Ahmedabad (2022–2027)

Integrated M.Sc. (IT & CA) (5th Year) | B.Sc. (IT & CA) Completed (2025) | GPA: 3.99/5

Ultra Vision School, Surendranagar (2022)

12th (Commerce): 93.14% | 10th: 83%

KEY PROJECTS

Daval Jewels CMS — Jewellery Content Management Platform (Ongoing Project)

- Built a full-stack Jewellery CMS using Next.js, TypeScript, MongoDB, Tailwind CSS, and Supabase Storage.
- Designed and developed a centralized admin dashboard for managing categories, products, media assets, and homepage product visibility using configurable flags such as Active, Featured, Latest, and Best Seller.
- Optimized performance using Server Components and Incremental Static Regeneration (ISR); currently developing homepage CMS customization with plans to add AI-powered jewellery image generation.

(Admin demo credentials available in the GitHub README).

ReviewMate AI — Automated Google Review Response System

- Built an AI-powered review management platform using Next.js, MongoDB, OpenAI API, and Google Business Profile API.
- Developed features including AI-generated replies, reusable templates, bulk responses, review tracking, and Google Maps integration.
- Enabled businesses to manage customer reviews efficiently from a centralized dashboard

AgriERP — Integrated ERP Solution for Small Farmers in India

- Built a full-stack ERP solution for small farmers to manage farm operations, finances, and inventory while monitoring real-time weather conditions and agricultural market prices.
- Integrated **real-time weather updates** and **APMC market price data**, enabling farmers to search commodity prices by **district, crop, or nearby APMC**, with **10-day price trend visualization** to support informed selling decisions.
- Developed an analytics dashboard to provide insights into farm activities, financial records, inventory, and crop performance

Role-Based Access Control (RBAC) System

- Built a secure backend authentication and authorization system using Node.js, Express.js, MongoDB, JWT, and Bcrypt with access & refresh token architecture and protected REST APIs.
- Developed features including dynamic role creation, permission (CRUD) management, role assignment, middleware-based authorization, and request validation using Zod.
